

# Daily Sprint Report

Date: 02.04.2024

## Team Update

- The team completed 2 out of 4 issues.
- 2 issues are currently in progress, one of which is very close to being finished and the other one is expected to be finished by the end of the week.

## Roadblocks

- The team faced a few conflicting ideas and a wrong understanding of how the Result Data Manager and Asset Manager components are supposed to look like. They were solved through an online Discord meeting.
- Some team members are still on holidays, which makes organising work a bit harder.

## Plans for the rest of the Sprint

- Polish the Figma prototype made.
- Get feedback on the Figma prototype.
- Begin discussion about starting the development phase.

## Metrics and Progress

- The team has attached screenshots of the current state of the sprint backlog and the sprint status report to give information about how much work has been done and how much work still needs to be done.
